Electromek Diagnostic Systems

Electromek offers a broad line of radiology and cardiology imaging software, advanced visualization viewing software, information systems and cloud services in a range of clinical settings. Based in St. Louis, MO, Electromek has been a Certified Business Partner of Sectra's since 2004.

Sectra Enterprise Imaging products offered include PACS (Radiology, Cardiology, Breast Imaging), Vendor Neutral Archive (VNA), DoseTrack, Orthopedic Solutions, and Digital Pathology. A true testament to Electromek's excellent service is their high customer retention rate. This is accomplished by providing Sectra's "Best in KLAS" products, along with a large and experienced PACS IT support team, including:

- » RTs focused on clinical applications
- » PACS system architects
- » Experienced helpdesk and support engineers
- » Interface specialists

“Electromek Diagnostic Systems' core expertise is medical imaging technology and healthcare information systems. They work hand-in-hand with Sectra to manage hospitals and imaging centers. Electromek is well positioned as a strategic, agile partner to healthcare providers and is a trusted partner to Sectra.”

Lars Wettergren, Global Partner Director

About Electromek: Founded in 1976 by three elite service engineers specializing in diagnostic medical imaging and medical imaging solutions, Electromek's guiding principles are built on customer service. Our reputation for excellent system integration and support comes from experienced staff, working closely with Sectra while adhering to their guidelines, ensuring that our systems are properly installed and serviced to provide optimal performance and low life-cycle costs.
